

# **BUSINESS-GENERAL (BUSN)**

---

## **BUSN 0500 Business Analyst Certificate (0 Credits)**

This comprehensive certification program is designed to provide qualified students with the necessary skills and industry certification (IIBA/ECBA Certification) that can lead to a Business Analyst career. Industry experts will teach and expose students to problem analysis, requirement gathering, use cases, meeting organization, Agile system development, data mining, and analytic and project management basics. This field may be of strong interest to individuals working in advertising and marketing, business strategy, research, or finance. Prerequisites for this course include BA, BS, or AS degree (does not need to be in computer science), general computer literacy, Microsoft Office experience, and verbal communication skills.

*Additional fees may apply*

## **BUSN 0501 SCRUM Master Certification (0 Credits)**

Agile and Scrum are popular in the software development world. In this class we will discuss how they are different and complementary, what benefit there is to an organization to use Agile and Scrum, and prepare for introduction certification exam, Professional Scrum Master 1. This course would be good for individuals delivering software or other products in a changing environment and needing customer focus.
