

CENTRAL STERILE PROCESSING TEC (CSPT)

CSPT 0500 Central Sterile Processing Technician (0 Credits)

Want to work in healthcare but not directly with patients? A Central Sterile Processing Certificate from CT State might be for you! Central Sterile Processing Technicians (CSPT) are responsible for packaging surgical instruments in hospitals, medical offices, surgical centers and clinics. They are highly needed healthcare professionals who improve the quality of patient care by minimizing infection rates. CT State's Central Sterile Processing Certificate program combines classroom and clinical experience, either online or on ground, covering topics and skills including decontamination and sterilization processing, anatomy and physiology, microbiology infection control and identification of surgical instruments.

CSPT 0595 Central Sterile Processing Internship (0 Credits)

This program provides CSPT students with real-world experiences to the daily operations of the Central Sterile Processing department.

Additional fees may apply
